Network for
MARITIME APPLICATIONS
satellite based navigation and logistics

Forschungshafen
Rostock

Unique Port Area

- complex user range
- critical local conditions
- high amount of ship traffic

perfect test and development environment

- What we want
- Video

Visions of the Network

- High precise and reliable **positioning within one decimeter** in the entire port area in real time
- Automation of **ship control systems** via GNSS applications
- Automation of the **intermodal transport** of goods
- **Time, cost and emission reduction** as well as **increase of user security** under all operating conditions

Fields of Activity

Logistics

Communication

Navigation

WG Tracking & Tracing

WG Portal
Research Port

WG Augmentation Systems

High precise and reliable positioning of ships, cargo, persons and infrastructure in the harbour area

Requirements

International Maritime Organization (IMO)

Maritime positioning and navigation are “Safety of Life” - applications of existing and future Global Navigation Satellite Systems (GNSS)

Position Error H/V (m)	< 10 / na	< 1 / na	< 0.1 / -
Alarm Limit (m)	25	2.5	0.25
Time to Alarm (s)	10	10	10
Integrity Risk	1e-5/3h	1e-5/3h	1e-5/3h

Galileo SoL
< 4 m / < 8 m
12 m / 18 m
< 6
3.5e-7/150s

H = horizontal
V = vertical
NA = not applicable

Infrastructures

Solution with
GNSS-technology

SEA GATE

Maritime test and
development
environment

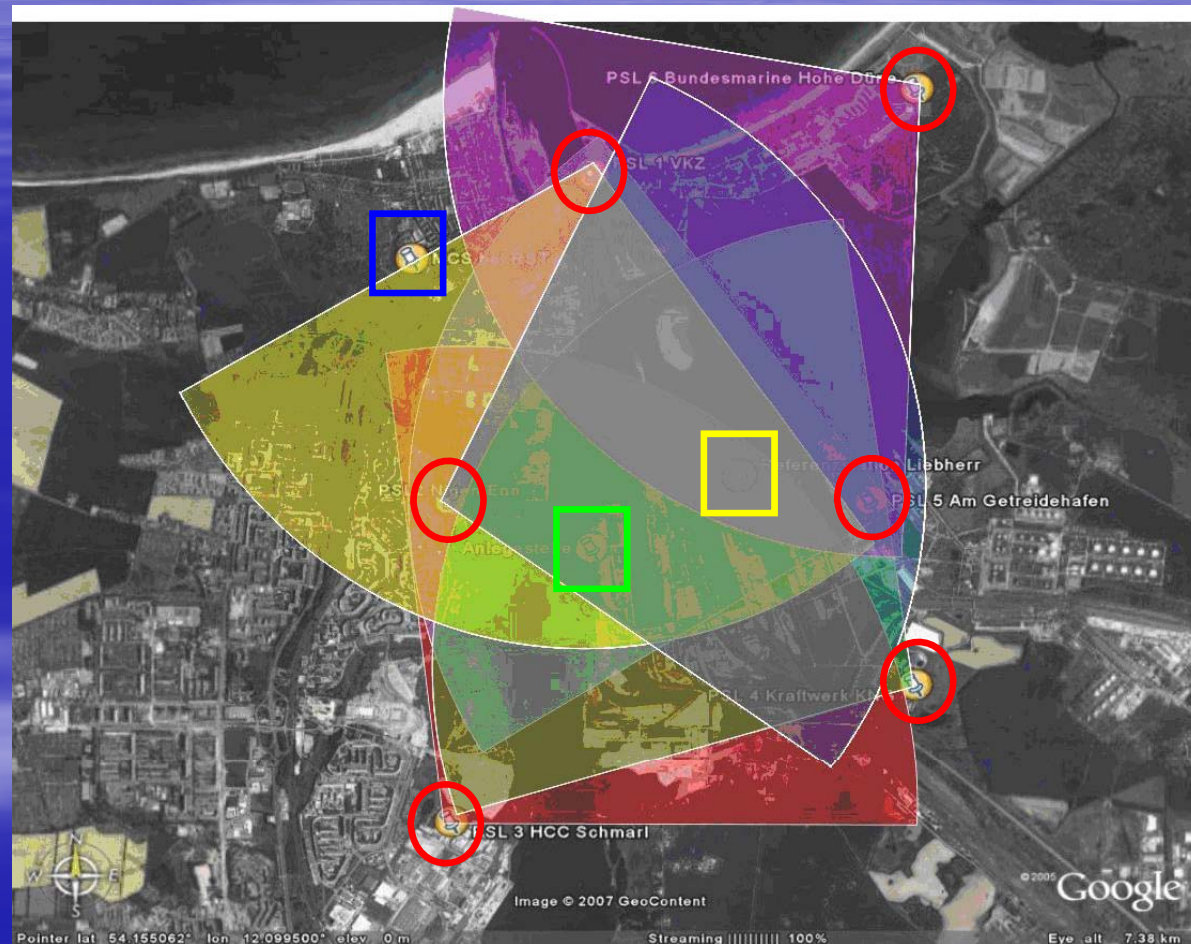

Network for
MARITIME APPLICATIONS
satellite based navigation and logistics

SEA GATE

- 6 pseudolites
- 1 reference station
- 1 master control station
- Preciseness < 0,5m
- Free accessible signals
- Operation 24h/7d
- base mode
- base mode + correction data

March 24th, 2010

neruus Brussels

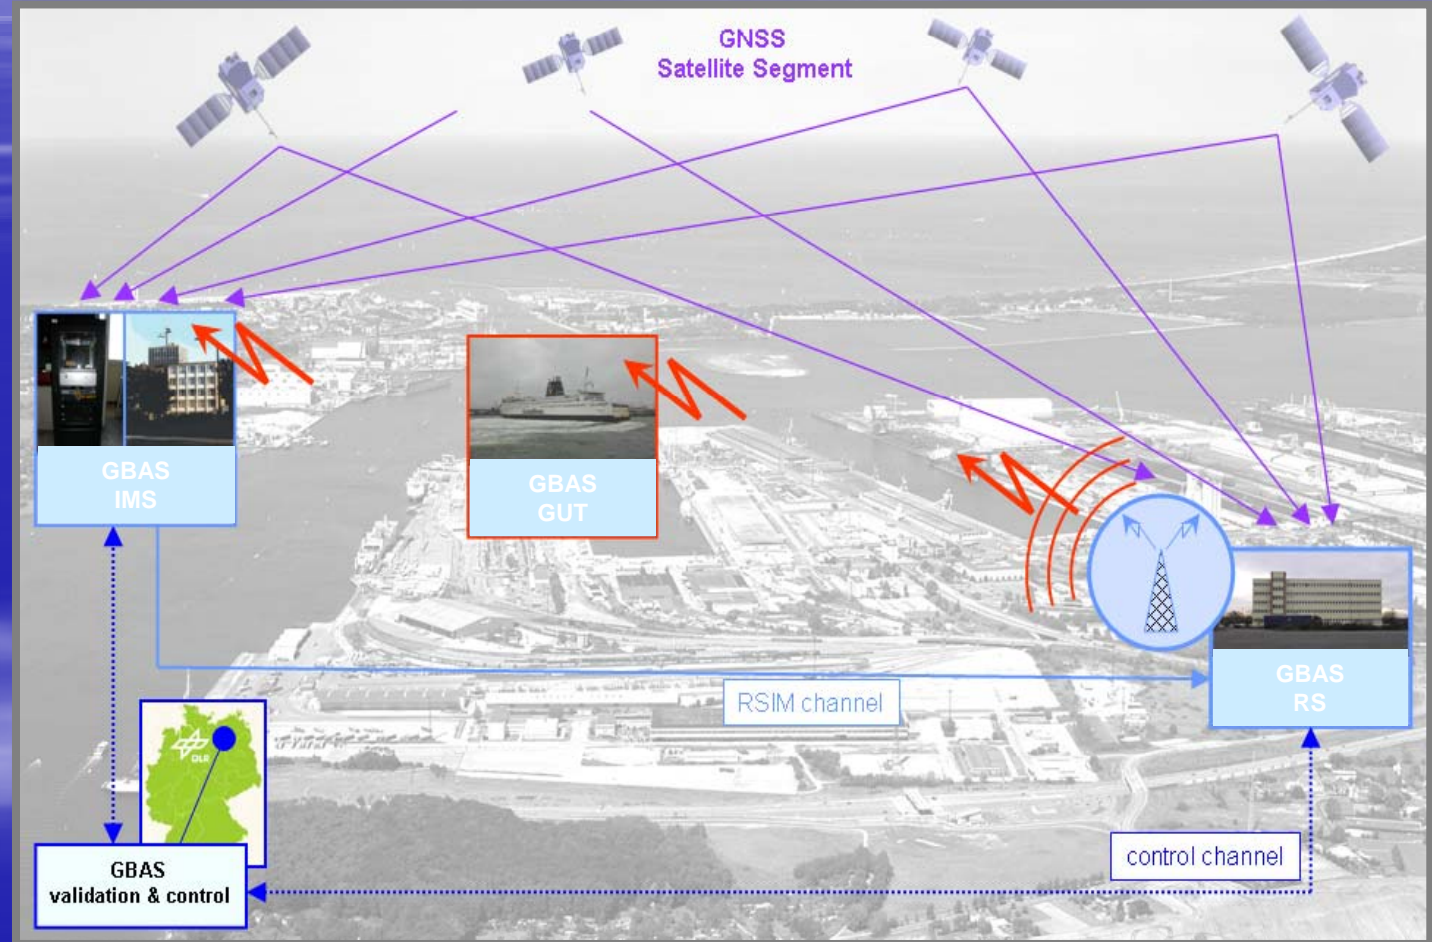

13

M-GBAS

Alegro/ASMS

- accuracy until 1dm
- phase-based DGNSS (RTK)
- correction and integrity data
- Galileo prepared
- base mode
- base mode + integrity message
- base mode and validation

Network for
MARITIME APPLICATIONS
satellite based navigation and logistics

M-GBAS

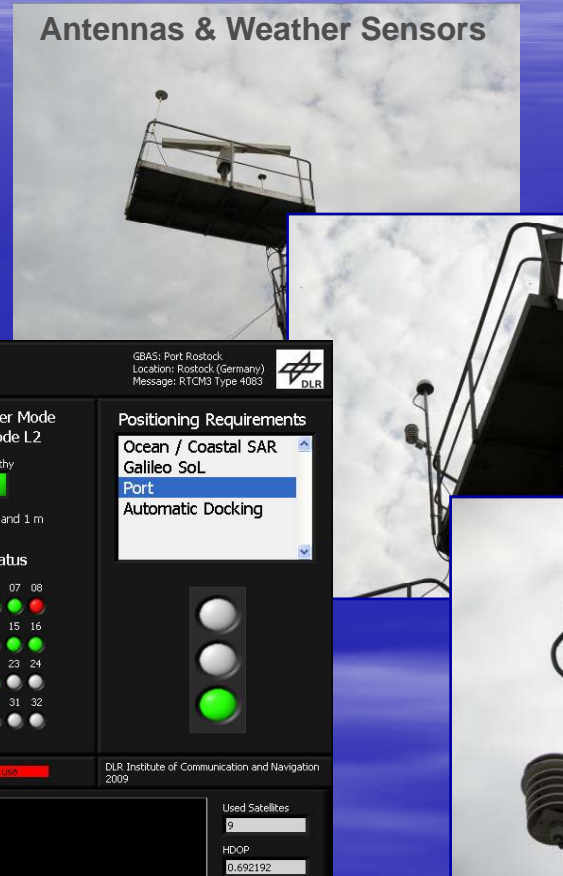

GHR1

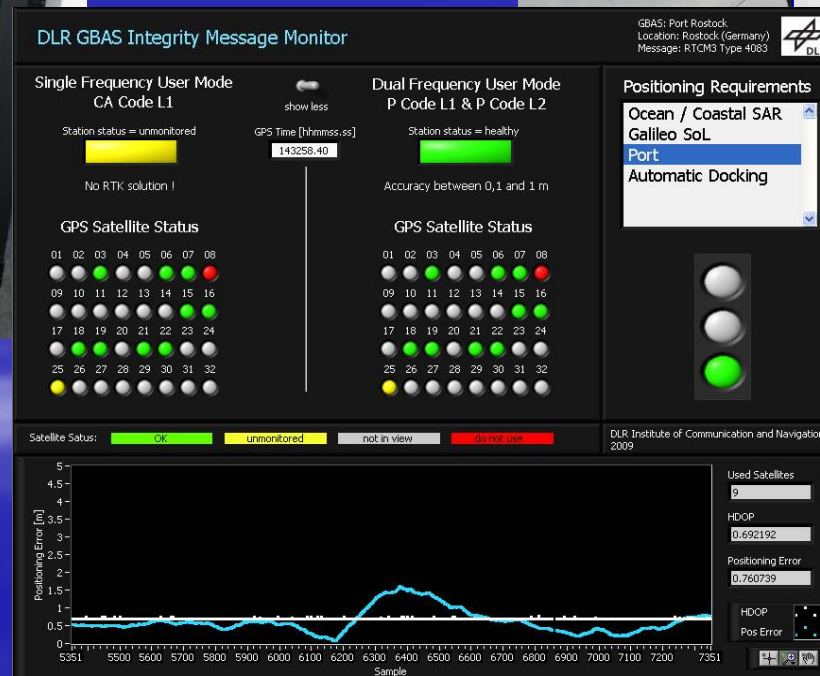

GHR0

Antennas & Weather Sensors

**GNSS receiver
(TOPCON NET-G3)**

Experience in Projects

SEA GATE

EADS RST

Infrastructure of 6 transmit stations to send Galileo like signals (pseudolites)

M-GBAS

DLR

Evaluation of GNSS signal quality and provision of correction and integrity data (RTK)

SAR

AGaPaS

University Rostock

Self activating rescue system, which detects person who fell overboard and which allows a remote-controlled assurance of the survival conditions

ZuMANZ

Hochschule Wismar

maneuver simulation for prediction of ship performance while varying of ship parameter like helm, propeller etc.

MARSPEED

Hochschule Wismar

Training simulator for maritime high-speed vehicles, maneuver training

Structure

- Who we are
- What we do
- **What we want**
- Video

What we want

- Users of the installed maritime Galileo GBAS in Rostock
- Users of high precise and reliable positioning in the port area
- Project partners to realize prototypes
- Long term cooperation partners
- Technical and legal information on GNSS, maritime industry and logistics
- Information on Galileo test beds in Europe

Events 2010

28.-29. April CERGAL Rostock

International Symposium on Certification of GNSS Systems & Services

04.-06. May BalticFuture Rostock

Workshop 'Innovative Approaches on Maritime Navigation and Logistics'

07.-10. September SMM Hamburg

International trade fair on shipbuilding, machinery & marine technology

15.-17. September CAMS Rostock

International Conference on Control Applications in Marine Systems

Proposal

Combined nereus Workshop in Rostock

- Live demonstration of installed maritime GBAS
- International projects with involvement of nereus
WG GNSS and WG GMES
- Participation in the 3rd Call of FP7

List of Abbreviations

- **DLR** – Deutsches Zentrum fuer Luft- und Raumfahrt, German Aerospace Center
- **GNSS** – Global Navigation Satellite System
- **DGNSS** – Differential GNSS
- **Pseudolites** – Pseudo-satellite, ground-based transmitter of GNSS signals
- **RTK** – Real Time Kinematic
- **SEA GATE** – Maritime Galileo Test and Development Environment
- **M-GBAS** – Maritime Ground Based Augmentation System
- **AGaPaS** – Autonomously Acting Rescue Robot For Persons in Distress at Sea
- **ZuMANZ** – condition based maneuver display for consulting of ship navigation
- **HERO** – Hafen-Entwicklungsgesellschaft Rostock mbH
- **GMES** – Global Monitoring for Environment and Security
- **M-V** – Mecklenburg-Vorpommern
- **IMO** – International Maritime Organization
